

POLYTUBES LP

GAS GATHERING

HIGH DENSITY POLYETHYLENE PIPE

High Density Polyethylene (HDPE) pipe has been a leading material choice for the Gas Gathering industry.

The reasons for using HDPE are vast and a few of those reasons are noted below. For further information please refer to CSA Z662.

ABOUT OUR PRODUCTS

- Polytubes manufactures the full spectrum of HDPE PE2708 and PE4710 for the gas distribution market.
- Polyethylene pipe can be plowed (planted) at temperatures as low as -34 °C.
- Excellent chemical resistant
- Certified PE-4710 HDPE resins are used
- Resistance to electrolytic corrosion
- Higher flow rates versus steel
- Pipe can be butt fused at site
- Leak free joints.
- Available in sticks, coils and reels
- Made to API 15LE Specification
