

## POLYTUBES LP

# CONDUIT

### **CUSTOM REELS & COILS TO MEET ALL OF YOUR CONDUIT NEEDS**

Polytubes manufactures HDPE conduit used to protect and house fiber optic, electrical, telecommunications and CATV cables for various industries. Polytubes offers a wide range of products in sizes of 1/2" through 12" and color coded for different industry requirements. Our conduit products are lightweight and flexible allowing them to be produced in continuous lengths on reels or coils. We customize reels and coils to meet your specific project needs. Longer lengths reduce the need for mechanical connections and other labor-related costs inherent to other types of conduit.

#### **ABOUT OUR PRODUCTS**

- Conduit conforming to:
  - ASTM: F2160, D3350, D3485
  - CSA C22.2: NO327, NO211
  - NEMA TC7-2016

#### **DESIGNED TO FIT YOUR PROJECT NEEDS**

- Available in lengths up to 7,500 feet. Customizable to accommodate the end users' specific requirements.
- Sequential footage markings to assist in identifying remaining lengths on partial reels and recording job site usage.
- Internal ribbing to reduce friction for more efficient cable pass through.
- UV protection for outside storage and aerial placement
- Solid and striped colour coding for specific identification requirements

#### **INDUSTRY SECTORS:**

Protect and house fiber optic, electrical, housing cables telecommunications and CATV cables for various industries.
